FORGET ABOUT IT LTD
Rented server solutions

"Progress means simplifying, not complicating"
Bruno Munari (1907-1998)

FORGET ABOUT it

" 50% of companies that lose their data go out of business immediately, 90% don't survive more than two years"
Source: Baroudi Bloor International

" It was estimated that 80% of businesses could potentially fail within 6 months of a major data loss"
Source: CBI survey

" Less than 1% of small businesses perform daily back-ups"
Source: Gartner

Forget About IT gives you:
- Fixed and controllable monthly costs
- Remote management
- Back up solutions
- Dependable hardware
- Rolling upgrade programme
- Disaster recovery protection

- Do you need to centralise your information AND/OR access it when you are away from the office?
- Would your business survive if you lost your customer data or financial records?
- How would your business cope if you lost your email for a day, or more?
- Do you want to minimise your downtime AND improve your business efficiency?
- Do you want to spend more time focusing on your core business and less time worrying about IT issues?

80% of total IT costs occur after systems have been installed
Source: Gartner

Why don't you **Forget About IT?**
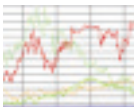

FORGET ABOUT IT LTD
Rented server solutions

Focus on your business and what makes you money

Using Forget About IT enables you to concentrate on your core business, confident in the knowledge that you have access to a professional and fast IT support service with **guaranteed costs and response times**, and at a fraction of the cost that you would pay for in-house IT staff. Forget About IT gives you the reassurance that if your server crashes or you lose access to your email your system is continually monitored and backed up so your business continuity is assured.

A more efficient system

Using the latest hardware from trusted names such as IBM, Dell & SuperMicro, Forget About IT gives you the reassurance of greater reliability, robustness and support as your hardware is maintained and upgraded on a rolling basis. We regularly develop, update and enhance the software to give you access to the latest technological advances, ensuring your business is more efficient and effective, examples include shared address books and calendars.

More cost effective

With Forget About IT your monthly costs are controlled and predictable, so you only pay for what you need. As your business grows and develops so does your IT system. Through the use of open source and non-proprietary software we integrate your information into standardized systems enabling you to access it wherever you are in the world, from whatever computer is available.

Greater security

The vast majority of security problems are created by internal weaknesses and come from within your own organisation. Your staff are potentially your biggest threat, by not having a local administrator password you are protected from existing or ex-employees installing back door programs on the server that give them access to your system. Your server is also configured to give you maximum protection from external threats such as viruses or hackers.

Need support or advice?

With just one phone call our highly skilled engineers will access your server, minimising your business interruption and downtime. If your server needs replacing we will come to you and install a replacement. This will be loaded with the latest back up, at no extra cost.
